## Professional Development Policy

The Michigan Online School Board of Directors believes in professional growth of staff and encourages the participation of staff in professional development.

The Superintendent may plan and implement a program of professional development for staff members that will include at least five (5) days/30 hours of district provided professional development (DPPD) annually.

Professional development should address the professional development needs of staff members and the school improvement plan.

The Michigan Online School Board of Directors may reimburse staff members for their costs incurred during professional development subject to the prior approval of the Superintendent.
